SDSTM4MAR

Softthinks Deployment SuiteTM

Current Computer Refurbishing processes are often labor intensive, repetitive and untracked human error generating procedures. Meanwhile, price pressure prevents the hiring PC experts to work on hundreds of PCs per month.

SDS4MAR, the all-in-one and accessible Refurbishing Solution will help you streamline your refurbishing process, reduce your operating costs and improve your traceability while avoiding important implementation costs and remaining compliant with Microsoft Refurbishers Programs.

- **Streamline your process**

Instead of employing both manual actions and semi-automation, SDS4MAR process is a one-touch integrated flow to perform: Hardware inventory & diagnostic, HDD wipe and image deployment. Reliably and consistently, with little training, your technicians will be guided through a few brief screens to select all actions to be performed.

- **Reduce your operating costs per unit by four**

Here is a small customer case study:

Customer Experience	Without SDS4MAR	With SDS4MAR
Technician intervention time per unit	40 min	3 min
Total process time per unit	450 min	180 min

Meanwhile our license system is highly cost effective.

- **Improve your traceability**

SDS4MAR logs every step of the process, including data sanitization, in real time in an open SQL database that can be connected to your EPR or WPS system using SQL.

- **Avoid expensive implementation costs**

On your Windows 2012 Server on which you configured Active Directory, DHCP & WDS you download SDS4MAR installer after purchasing your first month of licenses. Our install assistant will configure everything for you and your server will be up and running.

- **Remaining compliant to Microsoft Refurbishers Programs**

With our 25 and 50 seats server edition you will easily refurb more than 1000 computers per month and comply with Microsoft's mandatory wipe requirement (ADISA certified).

All these reasons made PCRR chose SDS4MAR as their new solution for computer refurbishment.

SDS4MAR exists in 4 different versions:

10 computers connected simultaneously to the server.

25 computers connected simultaneously to the server.

50 computers connected simultaneously to the server.

SDS4MAR options

- On-site install / support: our technician trains your staff and install SDS4MAR for you.
- Log Service config: export your results in a SQL database.
- Support options: our technical team is available by phone and IM to answer your questions.

About us

Softthinks reduces computer support, manufacturing & refurbishing costs since 2000.

Softthinks' solutions are adopted by major computer OEM, Retailers and Refurbishers.

We aim at improving the life of millions of users who deserve reliable computers, protection for their personal data & business continuity, while constantly streamlining and improving computer maintenance.

Major industry leaders are already working with us: Dell, Best Buy, Darty, Auchan and many more.
